INTRODUCED BY POPULAR DEMAND

We are beyond excited to present the first ever LEGO® *Star Wars*™ Ultimate Collector Series version of Luke Skywalker's X-34 Landspeeder.

Speeders are a familiar sight throughout the *Star Wars* galaxy, and Luke's X-34 model is the first we encounter in *A New Hope*. Our team has seen so many great fan-built LEGO landspeeders over the years. This model has been in high demand for a long time and our designers developed new elements, building techniques and colours to create the most authentic-looking replica possible, right down to the turbine wiring and cockpit details. And, at this scale, it almost feels as if you could just jump right in and speed off on your own galactic adventures!

Enjoy building!

**“LOOK AT THIS.
EVER SINCE THE
XP-38 CAME OUT,
THEY JUST AREN’T
IN DEMAND.”**

While Luke’s speeder is in high demand in this galaxy, we can see why his old sand- and sun-beaten version might be a tough sell on Tatooine, with newer models available on the market. It clearly has more than a few kilometres on its repulsorlift engine, and the missing port turbine cowling might leave the air-cooled thrust turbines vulnerable to Tatooine sandstorms. Fortunately, the sketchy traders in Mos Eisley seem willing to buy anything that moves, and even things that don’t. And, as Luke’s main source of transportation between his home and the Tosche

Station and Anchorhead outposts, his speeder is at least in decent working condition. With the Lars homestead burned to the ground, Luke has no qualms about selling it if it can get him enough cash to hitch a ride to Alderaan with Obi-Wan Kenobi.

Different X-34 Landspeeder models were created for the production of *A New Hope*. A life-size prop version was based on a car the actors could drive. A smaller scale model was used for special effects.

MEET THE MODEL DESIGNER

César Carvalhosa Soares
LEGO® Star Wars™ Designer

Luke's X-34 Landspeeder is one of the most recognizable vehicles in the *Star Wars* universe. It is with the landspeeder that Luke, Obi-Wan Kenobi, C-3PO and R2-D2 travel to Mos Eisley, where they meet Han Solo and Chewbacca for the first time and the adventure really begins!

As a *Star Wars*™ superfan, I was thrilled to bring the speeder to life, and this scale allowed us to add a bunch of super cool details, new elements and fun new building techniques. The big windscreen, vital for protecting the speeder's driver and passenger from the intense Tatooine winds, is a new element designed specifically for this model. The first iteration of the speeder had a sand colour scheme, but the nougat colour gave it a much more realistically weather-beaten look. In the movie, the speeder has a powerful thruster that lets it travel at great speed, hovering up to 1 meter (just over 3 feet) above ground. I hope this model will look great "hovering" above your shelf or desk!

With large-scale models like this comes the freedom to incorporate more intricate and authentic details.

- The cockpit is fitted with the design features of its movie counterpart, like right-hand driving, stick shift and detailed dashboard and display.
- Each thrust turbine has its own characteristics. The centre turbine's distinct colour pattern shows signs of multiple repairs with random scrap parts. How the port turbine lost its cowling we may never know. Luke is a skilled pilot, but with a maximum speed of 250 km/h, the speeder has likely seen a mid-air collision or two in its time.
- The display plaque includes technical specifications, a Luke Skywalker minifigure and an all-new C-3PO minifigure unique to this set.
